The library card is a passport to wonders and miracles, glimpses into other lives, religions, experiences, the hopes and dreams and strivings of ALL human beings, and it is this passport that opens our eyes and hearts to the world beyond our front doors, that is one of our best hopes against tyranny, xenophobia, hopelessness, despair, anarchy, and ignorance.

Lincoln in the Bardo

by George Saunders

"George Saunders is a complete original. There is no one better, no one more essential to our national sense of self and sanity."

—Dave Eggers

"Short-story virtuoso Saunders' first novel is an exhilarating change of pace. The bardo is a key concept of Tibetan Buddhism: a middle, or liminal, spiritual landscape where we are sent between physical lives. It's also a fitting master metaphor for Saunders' first novel, which is about suspension: historical, personal, familial, and otherwise. The Lincoln of the title is our 16th president, sort of, although he is not yet dead. Rather, he is in a despair so deep it cannot be called mere mourning over his 11-year-old

son, Willie, who died of typhoid in 1862. Saunders deftly interweaves historical accounts with his own fragmentary, multi-voiced narration as young Willie is visited in the netherworld by his father, who somehow manages to bridge the gap between the living and the dead, at least temporarily. But the sneaky brilliance of the book is in the way Saunders uses these encounters—not so much to excavate an individual's sense of loss as to connect it to a more national state of disarray. 1862, after all, was the height of the Civil War, when the outcome was far from assured. Lincoln was widely seen as being out of his depth, "a person of very inferior cast of character, wholly unequal to the crisis." Among Saunders' most essential insights is that, in his grief over Willie, Lincoln began to develop a hard-edged empathy, out of which he decided that "the swiftest halt to the [war] (therefore the greatest mercy) might be the bloodiest." This is a hard truth, insisting that brutality now might save lives later, and it gives this novel a bitter moral edge."

—Kirkus Reviews, starred review

"A stunningly powerful work, both in its imagery and its intense focus on death, this remarkable work of historical fiction gives an intimate view of 19th-century fears and mores through the voices of the bardo's denizens." —Library Journal, starred review

"Saunders makes you feel as though you are reading fiction for the first time." —Khaled Hosseini

"An astoundingly tuned voice—graceful, dark, authentic, and funny—telling just the kinds of stories we need to get us through these times." —Thomas Pynchon

The Islands at the End of the World

by Austin Aslan

From Amazon: In this fast-paced survival story set in Hawaii, electronics fail worldwide, the islands become completely isolated, and a strange starscape fills the sky. Leilani and her father embark on a nightmare odyssey from Oahu to their home on the Big Island. Leilani's epilepsy holds a clue to the disaster, if only they can survive as the islands revert to earlier ways.

A powerful story enriched by fascinating elements of Hawaiian ecology, culture, and warfare, this captivating and dramatic debut from Austin Aslan is the first of two novels. The author has a master's degree in tropical conservation biology from the University of Hawaii at Hilo.

The Looking Glass Wars

by Frank Beddor

From Booklist: Alyss Heart, heir to the Wonderland throne, is forced to flee when her vicious Aunt Redd murders her parents, the King and Queen of Hearts. She escapes through the Pool of Tears to Victorian London, but she finds she has no way home. Adopted by the Liddells, who christen her Alice Liddell and disapprove of her wild stories about Wonderland, Alyss begs Charles Dodgson to tell her real story. Even though he writes Alice's Adventures in Wonderland, she knows no one believes her. Years go by, with Alice repressing her memories. Then royal bodyguard Hatter Madigan, determined to start a war for Wonderland's throne, crashes her wedding. Beddor offers some intriguing reimaginings of Dodgson's concepts (such as looking-glass travel) and characters (the cat is an assassin with nine lives), but his transformation of Wonderland's lunacy into a workable world sometimes leads to stilted exposition on history, geography, and government. Even so, his attention has, happily, put Wonderland back on the map again. —Krista Hutley
