DIRECTOR'S PICK

"What If?: Serious Scientific Answers to Absurd Hypothetical Questions" ~ Randall Munroe

"Loaded with the same dry wit and blank-faced stick figures that populate XKCD, *What If?* is that rare book that will have you laughing as you learn just how a mass extinction might unfold."

-- Discover

"Munroe takes inane, useless and often quite pointless questions asked by real humans (mostly sent to him through his website), and turns them into beautiful expositions on the impossible that illuminate the furthest reaches, almost to the limits, of the modern sciences...The answers are all illustrated with XKCD's trademark stick figures...and these are eminently approachable."

-- Newsweek

"*What If?* Maintains a delightfully free-wheeling tone throughout, especially when complicated calculations lead to whimsical results. (Did you know that Yoda's Force power roughly translates to the amount of energy used to drive a smart car?) Despite all the hard facts and gigantic numbers, it never feels like a textbook—and you don't have to be a rocket scientist to enjoy it."
